

Instructions for using City Directories

Where I had Ship Manifest information, I have included that information with the City Directories as the passenger was asked for the name and address of the person he/she was going to meet. I used these addresses to compare with the information found in the city directories. It is very interesting to see the spelling of the names.

Please look through all the names. Many are not known to me but they appear in the same general area as our Gannam relatives. Beginning in 1918 the directories also included street indexing. I have tried to list any middle eastern sounding names that were at the same addresses. If you recognize any of these people, please let me know, so I can identify them as relatives or not.

I have protected the documents so they cannot be altered. If you have additional information you would like to add or if you find mistakes, please email me and I'll will make changes post haste!

Thanks.

Kim
